

# Advanced Security Vulnerability Report

**Target:** https://google.com  
**Scan Date:** 2025-08-04 16:34:40

## Executive Summary

**Risk Score:** 3/100

Detailed Findings

Finding Type	Severity	Description
Port Scan	Info	■Port 80 is open
Port Scan	Info	■Port 80 is open
Missing Security Headers	Low	Missing security headers: CSP, X-Content-Type-Options, X-Frame-Options, HSTS, X-XSS-Protection

Module-Specific Findings

Findings

Port Scan

Ai Findings

**Type:** Unknown  
**Severity:** Low  
**Description:** Missing security headers: CSP, X-Content-Type-Options, X-Frame-Options, HSTS, X-XSS-Protection

## **Recommendations**

- Implement a Web Application Firewall (WAF) to protect against common attacks.
- Regularly update and patch all software and dependencies.
- Conduct regular security assessments and penetration testing.
- Implement proper logging and monitoring for security events.
- Follow the principle of least privilege for all user accounts and services.
